一、个人选择与动机

1、你为什么选择保研？

(Why did you choose to go to graduate school?)

我保研最重要的一个原因是：通过对自己进行综合评估后，发现保研是实现自己未来职业规划的一个重要途径。其次，我对 XXX 专业比较感兴趣，但是由于本科期间所学知识比较浅薄，所以想在这个领域继续深造。爱因斯坦说过：“兴趣是最好的老师”，如果有机会进入研究生阶段学习，我相信自己在这个领域可以取得一定成绩。

One of the most important reasons for me to apply for postgraduate recommendation is that after a comprehensive self-assessment, I found that this is a significant way to achieve my future career planning. In addition, I am quite interested in the XXX major, but since my knowledge in this field is relatively shallow during my undergraduate period, I want to further my studies in this field. Einstein once said, "Interest is the best teacher." If I have the opportunity to enter the postgraduate stage, I believe I can achieve certain achievements in this field.

2、夏令营/预推免你还投递了哪些学校？

(What other schools did you submit to for summer

camps/pre-admission?)

我在选择投递的学校时，经过了一番深思熟虑。除了贵校，我确实还投递了 XXX、XXX、XXX 等几所与我研究方向和兴趣比较契合的学校。不过，我更加看重贵校在这个领域的学术声誉和师资力量。虽然我也投递了其他学校，但这并不意味着我对贵校不够重视。相反，我非常尊重和珍惜这次在贵校夏令营的机会，希望未来能够在贵校获得学术指导和成长机会。

I have given a lot of thought to the schools I have chosen to apply to. In addition to your school, I applied to XXX, XXX, XXX and several other schools that are more compatible with my research direction and interests. However, I valued your school's academic reputation and faculty in the field more. Although I also applied to other schools, this does not mean that I do not value your school enough. On the contrary, I highly respect and value this opportunity to attend a summer camp at your school, and I hope to receive

域的学术论文和研究成果时，发现了贵校在许多学科领域的突出表现和优秀师资力量。此外，我也通过社交媒体和论坛等渠道了解到贵校的校园文化和学术氛围。因此，这让我对贵校产生了浓厚的兴趣。

As early as before the college entrance examination, I had a preliminary understanding of your school through books and was motivated to go to your school at that time. However, for some reasons, I lost contact with your school; then, when I searched for academic papers and research results in related fields, I found your school's outstanding performance and excellent faculty in many subject areas. In addition, I also learnt about your campus culture and academic atmosphere through channels such as social media and forums. Therefore, this has given me a strong interest in your university.

inter-specialising in graduate school. Before I made this decision, I had made full understanding and preparation. All in all, I have full confidence in the development potential of this speciality and my ability to achieve excellent results in this speciality.

6、你是否有读博的打算？

（Do you have any plans for a PhD?）

对于读博这个问题，我曾深思熟虑过。就我目前的状态而言是想朝着读博的方向发展，但是是否确定读博，要等进入研究生阶段学习一段时间后，根据自身各方面的情况以及导师对我读博潜力的评估，再做进一步确认。总而言之，如果有幸能够进入贵校学习，我都会以博士的标准来严格要求自己，在专业领域做出成果。

I have given a lot of thought to the question of studying for a doctorate. As far as my current state is concerned, I would like to develop in the direction of studying for a doctorate, but whether I am sure about studying for a doctorate or not will be further confirmed after I have entered the postgraduate stage for a period of time, based on my own situation in various aspects and my supervisor's assessment of my potential for studying for a doctorate. foreign languages. Although there are still some problems with my speaking at the moment, I have been improving my speaking skills by watching live foreign language broadcasts every day.

31、你认为自己的面试表现怎么样？

(What do you think of your performance in the interview)

我认为这次面试的表现并没有达到我的预期。首先，尽管在考前已经根据贵校的夏令营面试要求做了相对充足的准备，但因为紧张，导致前面的一些问题没有表达清楚；其次，自己目前阅历尚浅，看待问题的深度和广度还不足以深入解答老师们的的问题。如果有幸能够进入贵校学习，我一定会高标准要求自己，全方面提升自己的能力。

I think the performance of this interview did not meet my expectations. Firstly, although I have made relatively sufficient preparation according to your school's summer camp interview requirements before the examination, I did not express some of the previous questions clearly because of my nervousness; secondly, my current experience is still shallow, and the depth and breadth of my view is not enough to answer the teachers' questions in depth. If I am fortunate enough to be able to enter your school, I will certainly hold myself to a high standard and improve my abilities in all aspects.

32、父母对你读研的态度？

(Your parents' attitude towards your postgraduate entrance exam?)

父母对于我读研的态度是非常支持的。他们认为研究生学历能够为我的职业发展提供更多的机会和更高的平台，因此他们鼓励我继续深造；其次，他们也理解保研需要付出一定的努力和时间，在备考期间，不管是精神还是物质都给予了我足够的支持和鼓励。所以我非常感谢我的父母，在未来我也会通过自己的努力去回报他们。

My parents are very supportive of my attitude towards graduate school. They think that a postgraduate degree can provide more opportunities and a higher platform for my career development, so they encourage me to continue my study; secondly, they also understand that it takes a certain amount of effort and time to study at graduate school, and during the preparation period, they gave me enough support and encouragement, both mentally and materially. So I am very grateful to my parents, and I will repay them in the future through my own efforts.

五、情境应对与态度

33、遇到压力时，你一般怎么处理？

(How do you usually handle stress?)

我认为压力是生活和学习中不可避免的一部分，所以我一直都是以一种积极乐观的态度来对待。当遇到压力时，我会冷静地分析压力的来源和性质，避免盲目应对或过度焦虑。然后，我一般会通过听音乐或运动的方式调整自己的心态。此外，我也会主动向家人、朋友或老师寻求帮助和建议。最后，我会根据压力的性质和紧迫程度，制定详细而可行的计划，并努力按计划执行。

I believe that stress is an unavoidable part of life and study, so I always take a positive and optimistic attitude towards it. When experiencing stress, I will calmly analyse the source and nature of the stress to avoid blind response or excessive anxiety. Then, I will usually adjust my mindset by listening to music or exercising. In addition, I will also take the initiative to seek help and advice from my family, friends or teachers. Finally, I will formulate a detailed and feasible plan according to the nature and degree of urgency of the stress and endeavour to follow the plan.

34、在团队中你一般喜欢担任什么样的角色？

(What kind of role do you generally enjoy in a team?)

在团队中，我通常会根据团队的具体需求和我的个人特长来灵活扮演不同的角色。但总体来说，我更倾向于担任协调者的角色。首先，我认为自己擅长根据团队成员的优势和特长进行任务分配，这有助于团队高效运作。其次，我会耐心倾听每一位团队成员的意见和建议，这有利于团队内部的沟通和协作。在面临团队冲突或困难时，我都会主动寻求解决方案，这有益于团队顺利推进工作。所以，我更加喜欢协调者这个角色。

In a team, I usually have the flexibility to play different roles depending on the specific needs of the team and my personal strengths. However, in general, I prefer the role of coordinator. Firstly, I think I am good at assigning tasks based on team members' strengths and specialities, which helps the team to operate efficiently. Secondly, I will patiently listen to each team member's opinions and suggestions, which is conducive to communication and collaboration within the team. When facing team conflicts or difficulties, I will take the initiative to seek solutions, which is helpful for the team to move forward smoothly. Therefore, I prefer the role of coordinator.

35、你认为本科教育与研究生教育有什么区别？

(What do you think is the difference between undergraduate education and graduate education?)

在我看来，首先，在于获取知识的方式不同，前者是被动汲取，后者是主动探索。本科学习更多的是通过上课的形式，而研究生阶段的学习，我认为更多的是通过自主阅读科研文献和做科学实验等自学的方式来获取知识。其次，我认为研究生阶段更加注重于创新思维的培养，因为研究生阶段对科研能力要求更高，而科研成果的诞生离不开创新思维。在未来的学习当中，我也会以此标准严格要求自己。

In my opinion, first of all, it lies in the different ways of acquiring knowledge, with the former being passive learning and the latter being active exploration. Undergraduate study is more in the form of classes, while graduate study, in my opinion, is more in the form of self-learning through independent reading of scientific research literature and doing scientific experiments. Secondly, I think that postgraduates pay more attention to the cultivation of innovative thinking, because postgraduates have higher requirements for scientific research ability, and the birth of scientific research results can not be achieved without innovative thinking. In my future study, I will be strict with myself in this way.

36、你认为英语在未来的研究学习中重要吗？

(Do you think English is important in your future research and study?)

我认为英语在未来的研究学习中非常重要。首先，在研究生阶段的学习中必然需要阅读大量的期刊文献，而良好的英语水平可以极大提高查阅外文文献的效率；其次，专业知识学习以及论文撰写都离不开英语；然后，在未来的生活和工作当中，良好的英语水平也能为我争取到更多的机会。所以，我会更加注重于英语的学习，熟练做到听说读写。

I think English is very important in future research and study. Firstly, I need to read a lot of journals in my postgraduate study, and a good command of English can greatly improve the efficiency of accessing foreign literature; secondly, English is indispensable for professional knowledge and thesis writing; and then, a good command of English can also help me to get more opportunities in my future life and work. Therefore, I will pay more attention to the study of English, and be proficient in listening, speaking, reading and writing.

37、你认为研究生需要具备哪些能力（品质）？

(What abilities (qualities) do you think postgraduate students

should possess?)

在我看来，研究生首先需要具备自主学习的能力。我认为研究生阶段相比于本科阶段获取知识的方式更多的是主动探索，而不是被动吸收。其次，需要具备创新能力。因为研究生阶段对科研能力要求更高，而科研成果的诞生离不开创新思维。然后，我认为最重要的一个能力是团队协作能力。因为不管是科研项目还是生活和工作，团队合作能力非常重要。

In my opinion, graduate students first need to have the ability to learn independently. I believe that the way of acquiring knowledge at the graduate level compared to the undergraduate level is more of active exploration rather than passive absorption. Secondly, they need to have the ability to innovate. Because graduate school requires more research ability, and the birth of research results can not be achieved without innovative thinking. Then, I think one of the most important ability is teamwork ability. Because the teamwork ability is very important no matter it is a research project or life and work.

38、你如何平衡学习和生活？

(How do you balance study and life?)

平衡好学习和生活对我来说一直都是一个重要的挑战，因为它是一个需要持续的努力过程。首先，我每天都会给自己制定一个大致的

时间表，包括学习时间和休息时间。确保在学习时间之外，留出足够的时间进行休闲和娱乐活动，以保持身心的平衡；其次，我会利用碎片时间进行学习，如排队等车、休息等。这些时间虽然短暂，但积少成多，可以帮助自己完成一些小的学习任务。

Balancing study and life well has always been a major challenge for me, as it is a process that requires continuous effort. Firstly, I set a rough schedule for myself every day, including study time and rest time. Ensure that I leave enough time for leisure and recreational activities outside of my study time to maintain a balance between my body and mind. Secondly, I will make use of fragmented time to study, such as queuing, waiting for the bus, taking a break, etc. These times are short, but they add up to a lot and can help myself to complete some small study tasks.

39、如果给你 offer，你一定会来吗？

（If you were given an offer, would you definitely come?）

如果我有幸获得贵校的 offer，我坚定地表示我一定会选择加入贵校。贵校在学术领域享有很高的声誉，其优秀的师资力量、丰富的科研资源和独特的学术氛围一直是我向往的。其次，我深知机会的来之不易，因此我会倍加珍惜。如果有幸成为贵校的一员，我将全力以赴，努力学习，积极参与科研活动，不断提升自己的学术能力和综合素质，为贵校的发展贡献自己的力量。

If I am fortunate enough to receive an offer from your university, I firmly state that I will definitely choose to join your university. Your university enjoys a high reputation in the academic field, and its excellent faculty, rich research resources and unique academic atmosphere have always been my aspiration. Secondly, I am well aware of the hard-earned opportunities, so I will treasure them. If I am fortunate enough to become a member of your university, I will do my best, study hard, actively participate in research activities, and continuously improve my academic ability and comprehensive quality, so as to contribute to the development of your university.

In terms of academics, they think I am down-to-earth, good at thinking, curious about new knowledge and willing to explore it in depth. In addition, they also praised me for my good interpersonal skills, my friendliness and willingness to help others, and my ability to play an active coordinating role in the team. Overall, their positive assessment of me makes me more confident to face future studies and challenges.
